RELEASE FORM

The doctor in our clinic specializes in the diagnosis and treatment of functional vision problems. Our clinic does visual efficiency and visual information processing evaluations. **The doctor in our clinic does not perform primary-care eye health or refractive examinations.** We do recommend that you have an eye health and refractive exam yearly by a primary-care optometrist. If we require you to have this exam prior to your visit with our doctor we will let you know. If you would like a list of primary care optometrists please let us know.

I understand that the doctor will not be assessing me/my child's eye health or doing a refractive examination in the course of his/her evaluation. I further understand that it is recommended that I have an eye health and refractive examination yearly by a primary-care optometrist. I agree to allow Vision Therapy KC to send the records from my exam to my primary care optometrist. If you have not had a primary eye health exam the previous statement is not applicable.
